

36th International Symposium of CIB W062 on WATER SUPPLY AND DRAINAGE FOR BUILDINGS November 08-10, 2010 Sydney, Australia

Invitation:

The Working Commission W062 on Water Supply and Drainage for Buildings, of the International Council for Innovation and Research in Building and Construction (CIB), organizes its 36th annual symposium in Sydney, Australia on November 08-10, 2010.

All experts, researchers, practitioners, regulators and delegates from industry from all over the world, with an interest in the developments in the field of water supply and drainage for buildings, are kindly invited to take part in this symposium.

Symposium objectives:

The aim of the symposium is to provide a forum where participants will exchange information on :

- recent research results
- industrial developments
- the characteristics and performances of existing systems
- data for the design,
- codes and standards.

Topics:

Within the general area of concern, the topics to be discussed should preferably include the following:

- environmental considerations : sustainable construction, water conservation, use of rainwater, buffering and infiltration of rainwater, reuse of waste water, small waste water treatment
- hydraulics of water systems in and around buildings
- health aspects related to water systems: Legionella, SARS,...
- durability (corrosion,...)
- new materials and products, solutions for renovation of piping systems (e.g. replacement of lead pipes, repair of corroded systems, refurbishment of drainage systems ...), installations for disabled and for elderly
- management and maintenance of water systems, commissioning, non destructive inspection techniques, water conditioning,
- standardisation and certification of materials, systems and professionals
- software for design.
- ...
